CELESTIAL AND TERRESTRIAL HEMISPHERES

£1,000.00

Haemisphaeria sphaerarum rectae et obliquae utriusque motus et longitudes tam coelestes quam terrestres ac stellarum affectiones monstrantia.

Cartographer	CELLARIUS, Andreas.
Date	1708
Stock #:	22131
Publication:	Amsterdam, Schenk & Valk, 1708. Original colour with additions, including gold highlights. 440 x 515mm.
Condition:	Small repair to verdigris crack caused by the original colour.

DESCRIPTION:

'Hemispheres displaying both the celestial and terrestrial motions and longitudes of either sphere, the upright sphere and the oblique sphere along with the influences of the stars.'

This chart was published in the 'Atlas Coelestis; seu Harmonia Macrocosmica', the only celestial atlas to be produced in the Netherlands before the nineteenth century. It was a compilation of maps of the Ptolemaic universe and the more modern theories of Copernicus and Brahe, and remains the finest and most highly decorative celestial atlas ever produced. It was originally published by Jan Jansson in 1660: this chart comes from Schenk & Valk's reissue.
