Vraÿ pourtraict des Costes marines de la partie Septentrionale de Jutlande, commençant du mont dict doodenbergh jusqu'a'll'entour la poincte de Schagen, monstrant comment on les navigera et evitera les gues y environ.

Cartographer	JANSSON, Jan.
Date	1620
Stock #:	25262
Publication:	Amsterdam, 1619. 255 x 555mm.
Condition:	Trimmed to plate at top and top right, as issued..

DESCRIPTION:

An early and very rare chart of north and west Jutland, orientated with north to the bottom left, with a title in Dutch and French.

It was published in Jansson's 'Het Licht der Zee-vaert', a direct copy of Willem Blaeu's sea atlas, possible because the privilege had lapsed. which prompted Blaeu to market a terrestrial atlas in direct competition to Jansson's.

The differences are the moving of the scale cartouche from Jutland to the bottom left corner and a different galleon bottom right.
