| <b>Condition:</b>   | A good example.                           |

### DESCRIPTION:

Important early chart of the Bay of Rio De Janeiro by Apres De Mannevillette, which appeared in the 1775 edition of his Neptune Orientale, one of the most significant Hydrographical works of the 18th century. It provides excellent detail throughout the map, including soundings, anchorages, islands, bays, and other topographical and hydrographical details.
